

Battery Cell NFP32700-6000

NASN Lifepo4 battery cell 3.2V 6000mah cylindrical lithium ion cell. 6000mAh Cylindrical LiFePO4 Battery Cell is 2000 times cycle cylindrical lifepo4 cell, has a higher discharge current, do not explode under extreme conditions and weigh less but have lower voltage and energy density than normal Li-ion cell.

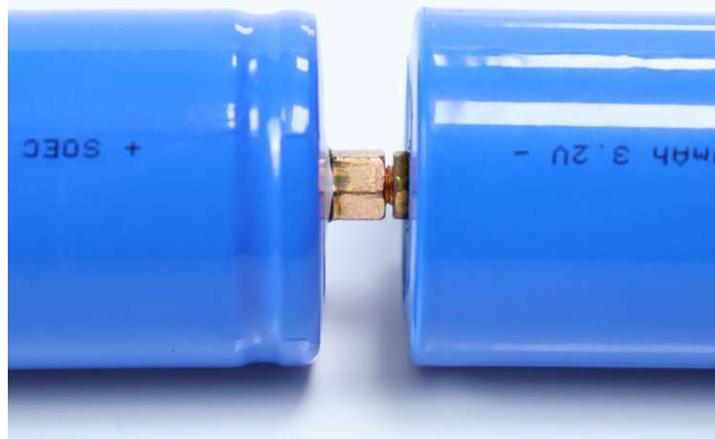

This lithium customized solutions and products are widely used in high-energy physics, railway infrastructure, public security, power communication, commercial finance, security communication, transportation logistics, exploration and mapping, photovoltaic energy storage and other fields.

Pure Copper Nut

Pure Copper Stud

Battery Cell NFP34145-15000

Type	Lifepo4 battery cell
Capacity	15000mah
Normal voltage	3.2V
Size (mm)	34*145mm (Diameter*Height)
Charging voltage	3.65V
Discharging cut-off voltage	2.0v
Max continuous discharging current	30A
Internal Resistance	$\leq 3\text{m}\Omega$
